

Neurosteroid Service Core**Leslie Morrow, Ph.D., Principal Investigator**

University of North Carolina, Chapel Hill NC

The aim of this core is to provide a service core to other INIA investigators exploring the effects of chronic ethanol exposure on HPA axis response and/or alcohol drinking in mice (Howard Becker, Michael Miles), rhesus monkeys (Kathy Grant, David Friedman), alcoholic humans that have been abstinent for one month (Bryon Adinoff) and cynomolgus monkeys that were withdrawn from high voluntary ethanol consumption (Kathleen Grant).
